

WELLHEAD CONTROL PANELS

Custom Wellhead Control Panels

For more than 60 years, we have designed and built a variety of systems including wellhead control systems.

We proudly offer exceptional engineering to customize these systems to meet your exact needs. Whether needing to control surface or sub-surface, we can build self-contained control systems for your unique application. No matter what your wellhead control panel needs are, we can design and build exactly what you need.

Available options include:

- Automatic shutdown upon detection of high or low flowline pressure or high temperature
- High pressure hand pump
- Control line relief valve
- Gauge to monitor control line pressure
- ESD valve for rapid shutdown
- Hydraulic reservoir sight glass
- Output pressures: 6K, 10K, 15K, 20K
- High and/or low-pressure sensors
- Hydraulic reservoir sized to customer specifications
- Bleed valve for controlled pressure reduction
